EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT

Los Angeles, CA

MBA, Full-Time Program, Technology Leadership & AI Specialization

Jun '27

- *Case competition:* Winner of Tepper Tech Innovation Challenge '25 – B2B Agentic AI Solutions for PMs; built a compliant GenAI engine using RAG and semantic clustering to transform unstructured data into traceable insights.
- *Courses:* AI Agents for Managers, Data & Decisions, Business Strategy, Tech Immersion

BITS PILANI

Goa, India

Bachelor of Engineering (Honors) – Mechanical Engineering | First Division

Jun '21

- *Leadership:* Head of The Music Society – managed events, practices, and a \$1000 budget for 40 musicians
- *Courses:* Computer Programming (C/C++), Symbolic Logic, Numerical Analysis (MATLAB), CAD/CAM

EXPERIENCE

COUNTRY DELIGHT *Subscription-based grocery delivery startup, 300K daily orders, \$160M revenue*

Gurgaon, India

Product Manager (Order flow, Offers, Subscriptions)

Jun '24 - May '25

- Owned end-to-end SDLC of the 'Cart Offers' engine, crafting technical PRDs, redesigning cart service APIs and modelling incentive algorithms with tech to increase Average Order Value by 24% (revenue up \$100K) at scale.
- Shipped data architecture, API, and platform upgrades to simplify shopping UX, collaborating with engineering and design to optimize SKU data models, reduce system latency, and organically improve SKU discovery by 25%.
- Led design, development, and post-launch analysis of Agile subscription projects, conducting cohort analysis with SQL, building novel features, and instrumenting events to uplift subscriptions by 10% (\$30K MRR) over a quarter.
- Architected an LLM-powered recommendation engine prototype, evaluating foundation models against strict latency and privacy constraints and defined API integration to secure executive buy-in for production rollout.
- Managed the technical roadmap for our internal B2B CRM platform used by 200+ CX/Ops agents, shipping 10+ JIRA tickets per sprint defining API requirements and workflow automations to reduce resolution time by 30%.

Associate Product Manager

Jan '23 - Jun '24

- Drove a data-driven, targeted experiment to grow loyalty program membership, achieving 93% more conversion than baseline (A/B tests), projecting a \$21K MRR, and securing management go-ahead for formal development.
- Spearheaded CSAT initiatives by conducting 25+ user interviews and LLM-assisted complaints analysis, then led a cross-functional roadmap with engineering and ops to resolve systemic issues and reduce complaints by 27%.
- Analyzed root causes for retention drops by creating conversion funnels and a dashboard for outcome metrics, subsequently introducing strategic nudges in the wallet recharge UX to enhance day-30 retention by 8%.
- Executed the app's biggest UX overhaul ('SingleCart' project), partnering with engineering, design, and QA on UATs and regression testing to ensure a stable release with 2 major and 20 minor bugs fewer than benchmark.
- Integrated GenAI tools (Claude, ChatGPT, Gamma) into the product development lifecycle to optimize research, test case generation, prototype design, and technical documentation and accelerate sprint velocity by 10%.

COLLEGEDUNIA WEB PVT LTD *Ed-tech startup diversified into affiliate marketing, \$23.5M revenue*

Gurgaon, India

Associate Product Manager

Aug '21 - Jan '23

- Developed automated Python agents using pandas, requests, and BeautifulSoup to analyze 7 major competitors, getting CRM-ready data on 11000+ prospective clients that was used to onboard 120 new clients in 3 months.
- Managed high-revenue Google Ads campaigns for major brands like Nike, leveraging advanced SEM practices, market trends, and competitive research to achieve 310%+ ROI, directly contributing to firm revenue growth.
- Led end-to-end development of an e-commerce mobile app for a 3-country release, managing the business, tech, design, and content teams to achieve a 4x uplift in downloads and 250% increase in Daily Active Users.

ADDITIONAL

- **Certifications:** Accelerated Computing with CUDA Python, Building RAG Agents with LLM – NVIDIA DLI.
- **Skills:** Python, C++, Funnel Analysis, UAT, A/B testing, Design Thinking, User Interviews, Stakeholder Management.
- **Tools:** Jira, Confluence, Figma, SQL, Tableau, MoEngage, GenAI tools, Firebase, CRM, CMS, ClickUp, Excel.
- **Extracurriculars:** Passionate musical performer, winning 'Best Drummer' and 'Best Indian Band' awards among 50 musicians and 10 bands from 5 states at Christ University's national-level competition in 2020.
